

Snowmobile Diaper Cake!!!

Published February 3, 2015 | By ThomPetty | Edit

Hi Everyone!

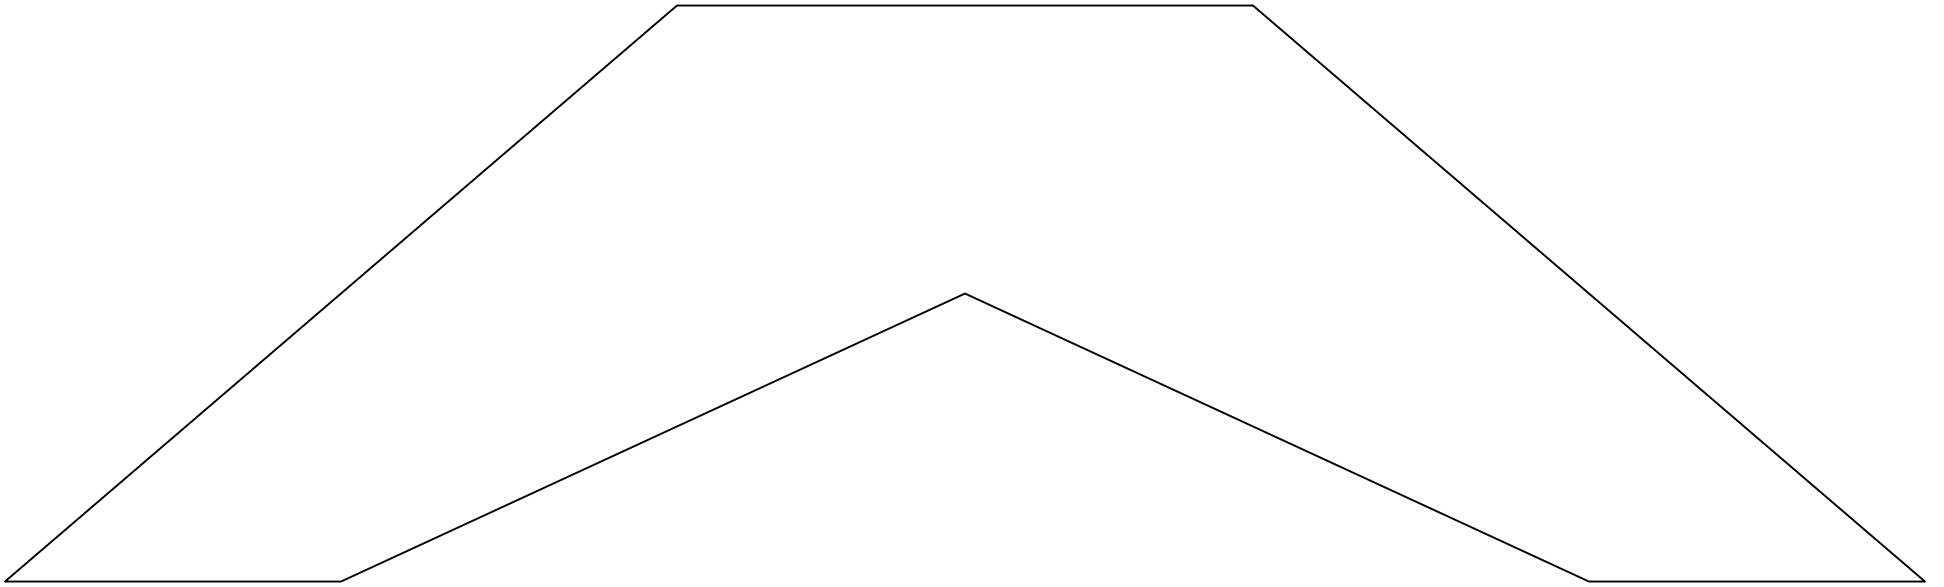

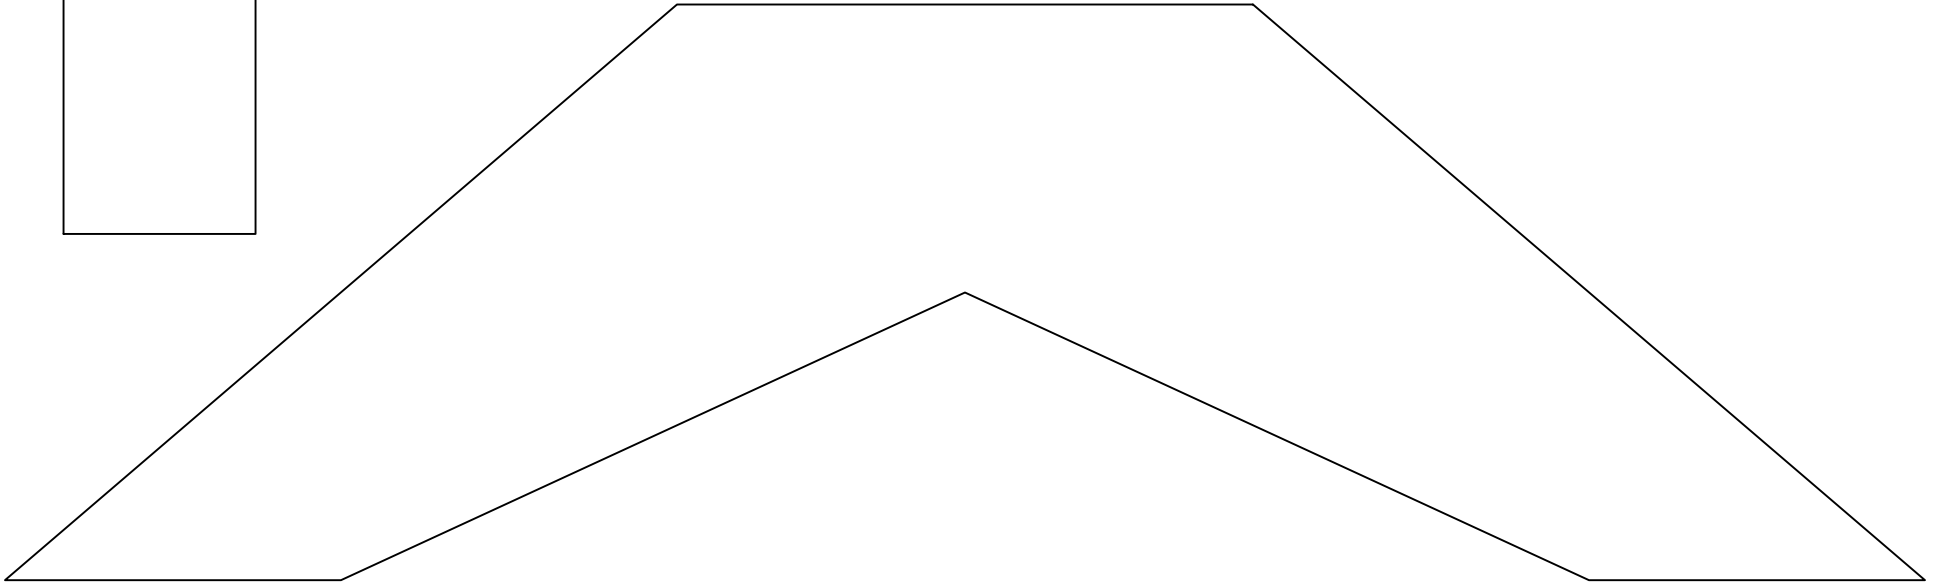

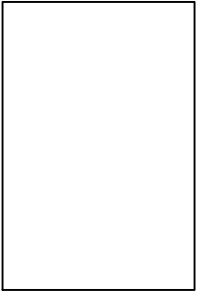

Here is another cool Diaper Cake idea, a Snowmobile! I had a few people request we try and make it. So with a little foamboard help from Paulie I came up with a fun idea. It is a little harder to make than some of the other Diaper Cakes on my YouTube and website, but I think you can make it too. The only hard part is drawing and cutting the foamboard. Paulie was nice and made a PDF you can download. Please click on and save the PDF file below. Then print and follow the instructions and cut out the parts. Below is also the list of items needed to make it. You can also add any accessories you may like to make it extra special! Thank you so much for visiting my website!
